

Wenping Zou (Ph.D.)
University of Houston
Houston, TX 77204

Dear Prof. Raccah,

My name is Wenping Zou. I obtained my Ph.D. degree in the summer, 2022 at University of Houston. I am writing here to express my sincere interest in open postdoctoral position in your lab. I would love to pursue my postdoctoral research as a member of your team.

Due to my research experience covers organometallic catalysts design, polymer synthesis, and protein-based sensor synthesis, now I still want to continue my research in chemistry, especially interdisciplinary area. The field of photosynthesis is the one that unites multiple area including biochemistry, structural biology, mechanics and modeling. As an excellent research institution that led by creative faculties, the department of chemistry in UT Austin has the most inspiring research environment. I firmly believe that the interdisciplinary research experience here will be the most important building block of my career. It will be my honor to join your group.

I am a self-motivated, independent research associate with nine years' lab experience. As a hardworking, efficient and detail-oriented candidate, I feel my **Chemistry** and **Biology** knowledge, **protein-based metal sensor** research and **bioinformatics** training experience could be a major asset to your lab. I would be very happy in setting up a time to discuss my skills and qualifications with you. Please feel free to let me know if you have any question and look forward to hearing from you.

Sincerely,
Wenping
